PROFESSIONAL SUMMARY

Full Stack Developer and Computer Engineer with a backend focus, experienced in building and maintaining business-critical software for real operational workflows.

Strong background in PHP/Laravel, legacy PHP/MySQL systems, SQL, data modeling, versioned migrations, automated validation, CI/CD, integrations, and maintainable web applications.

I specialize in translating complex business rules, operational processes, and data-heavy workflows into reliable software used in production environments.

SKILLS

- **Backend & Data:** PHP, Laravel, Python, FastAPI, MySQL, PostgreSQL, REST APIs, SQLAlchemy, data modeling, migrations, SQL optimization
- **Quality & Infrastructure:** PHPUnit, integration tests, GitLab CI/CD, Docker, Git, Linux, database schema validation
- **Frontend & Web:** JavaScript, TypeScript, Next.js, React, Tailwind CSS, shadcn/ui, jQuery, Bootstrap, responsive design, WordPress
- **Integrations & Automation:** OpenAI API, Twilio API, workflow automation, AI-assisted business processes
- **Languages:** Spanish (Native), English (C1 - EF SET Certified)

EXPERIENCE

SERFE, Full Stack Developer

April 2025 – Present

- Develop and maintain PHP/MySQL business applications and WordPress websites for external clients, with a focus on operational systems, maintainability, and production reliability.
- Build and evolve modules for a legacy PHP/MySQL production intranet used in dairy operations, including recipes, batch/lot traceability, inventory movements, stock transfers, input consumption, and operational reporting.
- Work directly with client stakeholders to analyze reported operational issues, understand business rules, design technical solutions, implement changes, and validate them before production.
- Built React components for sales dashboard data visualizations and improved data-heavy reporting workflows through SQL optimization, database indexes, and MySQL data modeling.
- Designed GitLab CI/CD validation workflows with PHPUnit, integration tests, migration checks, and database schema snapshots to reduce integration errors before production deployments.
- Modernized legacy interfaces from Bootstrap 2 and jQuery 1.7 to Bootstrap 5 and jQuery 3.x, improving maintainability, usability, and mobile compatibility.

CIPAX, Full Stack Developer

January 2024 – April 2025

- Developed and maintained custom Laravel 10 applications using FilamentPHP, MySQL/PostgreSQL, Docker, JavaScript, and Bootstrap.
- Built administrative and financial modules for accounts, cash/bank movements, payment workflows, reports, dashboards, and document management.
- Contributed to systems for accounting, events, social programs, and grants, integrating Twilio and OpenAI for WhatsApp automation and AI-generated timelines.

FEATURED PROJECTS

- **Personal Finance Platform (TallyNorth):** Full-stack personal finance application for cash flow projection, multi-currency accounts, recurring expenses, and credit card installment tracking. Built with Next.js, TypeScript, Tailwind CSS, shadcn/ui, FastAPI, SQLAlchemy, and PostgreSQL.
- **Intelligent Investment Decision System:** Development of a decision support system for the financial market using Machine Learning on time series data. Developed with Python, PyTorch, SQLite, and Docker.

EDUCATION

Bachelor's Degree in Computer Engineering - Completed 2023

Universidad Nacional del Litoral - Santa Fe, Argentina
